Eco-Rack pallet from Eco Pallets, Inc.

SAVE TIME & MONEY WITH ECO RACK PLASTIC PALLETS

Introducing the patented Eco Rack pallet, the only affordable plastic pallet on the market that is nestable, stackable, and open rackable. Our unique design allows this plastic pallet to work like a wood pallet without relying on the steel or fiberglass reinforcement often used in other rackable plastic pallets. Thus, creating a cleaner, more cost effective pallet, with the strength and durability to meet most industry needs.

The Eco Rack pallet will lower your company's pallet logistics and handling costs, improve product and employee safety, and reduce your company's environmental impact.

Logistics

Cut logistical handling of your pallets by 66% with the Eco Rack Plastic Pallet—due to its unique patent pending design that allows it be nested, so there are more pallets per delivery: THIS MEANS-

- 66% less cutting of purchase orders by your Purchasing Department.
- 66% less trucks traveling to your facilities.
- 66% less trucks to unload at your docks.
- 66% less forklift traffic in your facilities to move pallets from the warehouse to production lines.
- 66% less internal paper work to receive and process each truckload of pallets.
- 66% less floor space needed to store truckloads of pallets, about 800 less sq. ft.
- 66% improved efficiencies using the Eco Rack pallet can save your company up to \$1,200.00 or more per truckload of pallets.

Safety

- Improve floor safety with the Eco Rack's nestability, which guarantees safe and straight stacks of pallets every time.
- The Eco Rack pallet weight of 22 lbs. is ergonomically superior to wood pallets that can weigh up to 65 lbs.
- Eco Rack plastic pallets do not split, crack, splinter, or break apart like wood pallets because they are made of a unitary and sanitary plastic construction that does not cross contaminate the products they carry or injure the people that work with them like wood pallets can.
- Plastic pallets are not a food source or ideal habitat for bugs and germs that can contaminate products. This makes them an ideal pallet for the food, pharmaceutical, or medical industries.
- How much is improved safety for your customers and employees worth to your company?

Go Green

- In the Eco Rack ER4840 we use 100% recycled plastics.
- Eco Rack pallets are 100% recyclable at the end of their useful life cycle.
- Buy 1 of our Eco Rack pallets and keep 138 lbs. of plastic and wood waste from entering our nations landfills.
- Buy 2 of our pallets and save one tree from being harvested to construct 4 wood pallets.
- Reduce your company's Carbon Foot Print by cutting down truck traffic by 2/3, which cuts diesel consumption by 2/3.

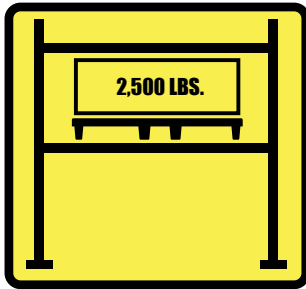

US PATENT # 10,017,296 B2 AND US 10,099,814 B2

ECO PALLETS, INCORPORATED

Pallets that move you.

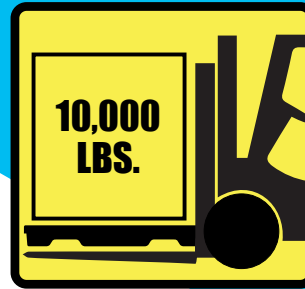

SPECIFICATIONS:

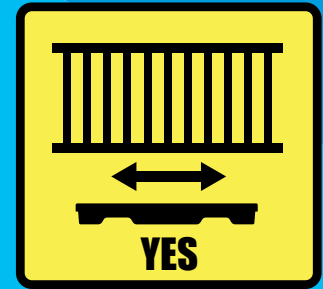

**OPEN RACKABLE IN 42"
DEEP PALLET RACKS**

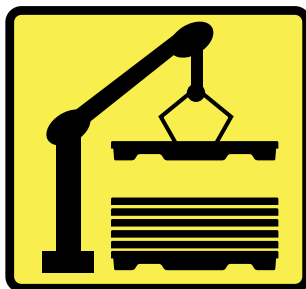

2,500 LBS. DYNAMIC

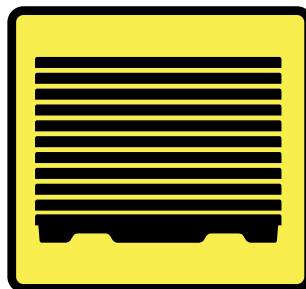

10,000 LBS. STATIC

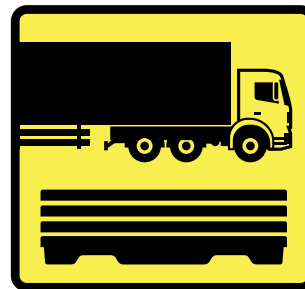

**ROLLER CONVEYOR OK
UP TO 5.25" ON CENTER**

**AUTOMATION
FRIENDLY**

NESTABLE TO 60 PER STACK

**30 STACKS PER TRUCK
1,800 PALLETS PER 53' SEMI**

**IMPORT/EXPORT
ISPM-15 EXEMPT**

**REPELS WATER
NON H2O ABSORBENT**

**DRAINS WATER
WASHDOWN READY**

**MICRO BIOLOGICAL
ORGANISM RESISTANT**

100% RECYCLABLE

AVAILABLE IN SEVERAL COLOR AND MATERIAL COMBINATIONS*:

- Recycled material (dark grey only**) ER4840
- FDA approved material (blue*) ER4840FDA
- Performance material (black*) ER4840P

*Call for custom colors.

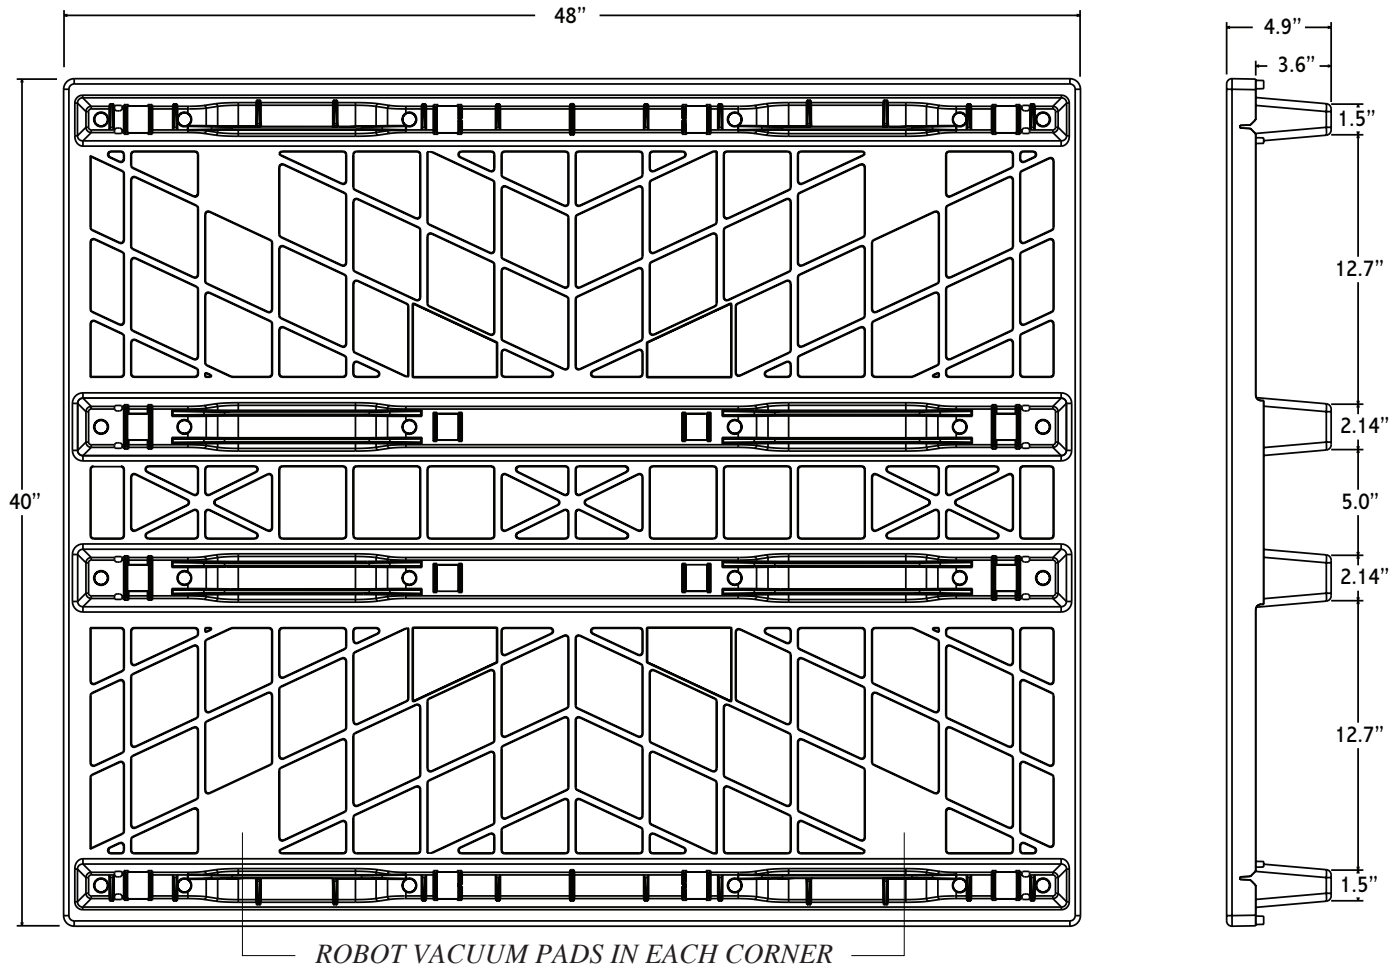

**No color options available

Static, Dynamic, and Rackable load rates were established by using ASTM test methods at Virginia Tech pallet testing lab. Test reports are available upon request. It is recommend that the customer do field test to verify that any pallet works for their application.

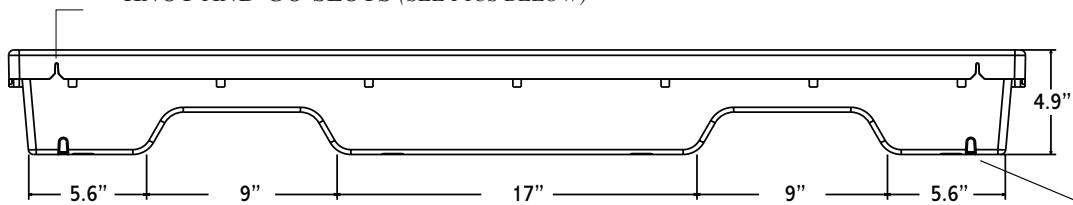

Holds 2,500 lbs. in open 42" pallet rack

PALLET WEIGHS 17-22 LBS.

KNOT AND GO SLOTS (SEE PICS BELOW)

*RACK
ALIGNMENT
SLOTS*

For tying stretch wrap.

Also works for roping.
